Technical Documentation & Developer Resources

Gladia | Hackathon resource guide · Quick access to documentation, AI coding tools, SDKs, examples and voice-agent integrations.

01 | Documentation

Complete documentation — All Gladia guides and developer references.
docs.gladia.io

Getting started — Set up an account and generate your API key.
docs.gladia.io/chapters/introduction/getting-started

Live STT quickstart — Start real-time speech-to-text; especially useful for voice agents.
docs.gladia.io/chapters/live-stt/quickstart

Pre-recorded STT quickstart — Transcribe existing audio and video files.
docs.gladia.io/chapters/pre-recorded-stt/quickstart

Recommended voice-agent parameters — Suggested settings for live voice-agent use cases.
docs.gladia.io/chapters/live-stt/recommended-parameters

Playground — Try Gladia without writing code.
docs.gladia.io/chapters/how-to-use-gladia/playground

API reference — Endpoints, parameters and API details.
docs.gladia.io/api-reference

LLM-readable documentation — Share with Cursor, Claude or ChatGPT as development context.
docs.gladia.io/llms.txt

02 | Build with AI coding agents

Gladia Skills — Skills for Claude Code, Cursor and Codex covering live transcription, pre-recorded audio, diarization and troubleshooting.
github.com/gladiaio/skills

Install with your skills-compatible agent:

```
npx skills add gladiaio/skills
```

Claude Code alternative:

```
/plugin marketplace add gladiaio/skills
```

```
/plugin install gladia
```

Gladia MCP — Open-source MCP server for transcription workflows inside Claude, Cursor or Codex.
github.com/gladiaio/gladia-mcp

MCP setup guide — MCP configuration and usage documentation.
docs.gladia.io/chapters/how-to-use-gladia/mcp

Claude Code MCP command (replace the API key placeholder):

```
claude mcp add gladia --env GLADIA_API_KEY=... -- npx -y @gladiaio/mcp
```

03 | SDKs, CLI & code samples

SDK documentation — JavaScript / TypeScript and Python SDK setup and usage.
docs.gladia.io/chapters/how-to-use-gladia/sdk

```
npm i @gladiaio/sdk
```

```
pip install gladiaio-sdk
```

SDK repository — Source code and SDK releases.
github.com/gladiaio/sdk

Gladia CLI — Transcribe an audio file using a command-line workflow.
github.com/gladiaio/gladia-cli

Code samples — Reference implementations and example projects.
github.com/gladiaio/gladia-samples

04 | GladiaFlow

Open-source real-time desktop dictation for macOS and Windows. Hold a key, speak, and insert the transcribed text into any app. Useful for controlling coding agents by voice during the hackathon and as a starting point for voice + computer-use projects.

GladiaFlow source code — Desktop application repository.
github.com/gladiaio/gladiaflow

GladiaFlow documentation — Setup and product guidance.
docs.gladia.io/chapters/how-to-use-gladia/gladia-flow

05 | Voice-agent integrations

Explore integration guides for common voice-agent and automation stacks:

Pipecat — Integration guide.
docs.gladia.io/chapters/integrations/pipecat

LiveKit Agents — Integration guide.
docs.gladia.io/chapters/integrations/livekit

Vapi — Integration guide.
docs.gladia.io/chapters/integrations/vapi

Twilio — Integration guide.
docs.gladia.io/chapters/integrations/twilio

n8n — Integration guide.
docs.gladia.io/chapters/integrations/n8n

All links are clickable. Commands and resource descriptions are based on the hackathon information provided.
